

Health, Safety and Environmental Policy and Values Statement

Mission

Quest Integrity and its employees will embrace and uphold the highest standards of Health, Safety and Environmental (HSE) responsibility while providing unparalleled inspection and assessment services to our clients.

Policy

Quest Integrity will integrate its HSE Philosophy and Principles in every aspect of its business to include all decision making and operations activities. We will protect the environment and the health and safety of employees, clients, contractors and the public; fully complying with all applicable legal and regulatory requirements.

Philosophy & Principles

It is Quest Integrity's HSE philosophy that all practical and necessary steps must be taken to prevent incidents. Through these steps we further believe that all incidents are preventable. Our philosophy is that HSE responsibility must come before business interests, and is fundamental to our company's continued success. This dynamic, comprehensive philosophy fosters a responsible corporate culture founded on the following principles:

Personal Commitment

Employees will be empowered and thoroughly trained to accomplish our goal of zero incidents. Only personnel that embody our HSE philosophy will work for Quest Integrity.

Management Commitment

All levels of Quest Integrity management will be committed to the health, safety and environmental wellbeing of the workplace. Management will set and review HSE goals yearly in an effort to continuously improve our performance.

Compliance

All Quest Integrity employees will fully comply with all applicable laws, regulations, and company rules and procedures as a condition of employment. We will regularly conduct internal and external audits, correct deficiencies, and immediately report to authorities as required.

Prevention

All employees will be thoroughly trained in hazard recognition and mitigation. We will continually expand our knowledge base through investigation of and learning from all injury, illness, property damage, environmental and near miss incidents.

Cooperation

Health, Safety and Environmental best practices are not proprietary. We will continually work with clients, partners, public sector, and non-profit organizations to develop and promote advanced, effective methods to protect people and the environment everywhere.
